## FULL STACK DEVELOPER

I am an honest and enthusiastic individual offering my skills as a passionate full-stack developer in exchange for a challenging position that offers professional development.

From analysing participant data at university to collating and validating client data at Sanlam, I have been working towards a point where I can use conditionals I once used in Excel to now handle back-end logic.

Working in the financial industry provided a considerable experience that equipped me with the confidence to find a career that matched my growing technical aspirations.

Like many others, I found an opportunity during the pandemic to invest time into a career I have a genuine interest in, and I have since steered my life towards that goal.

## PROJECTS

As a graduate of iO Academy in Bath, I worked on projects individually and as part of a scrum team. Every project followed an agreed Git branching strategy for version control, and pull requests were peer-reviewed for consistent code quality. Below is a selection of them; you can find links to their GitHub repositories and more examples on my portfolio.

### WORD NERD - JAVASCRIPT GAME

Following a brief to build a version of the game 'Wordle' we:

- Fetched JSON data to select the randomised word.
- Compared the random word to the cookie's and used logic to refresh the page until they were different.
- Utilised event-listeners to manipulate the DOM for the keypad interface.
- Validated and sanitised the input from malicious users.

### JOB LISTING - JAVASCRIPT REACT

Tasked with creating a job listing site in React we:

- Agreed a component structure to anticipate bottlenecks and where the use of hooks, useState and useEffect, were needed.
- Used SASS to keep styling inline with the brief's designs, creating variables for its repeating features.
- Asynchronously parsed JSON data from an API.

### DINO FINDER - OBJECT ORIENTED PHP

In order to make a collection we:

- Designed hi-fidelity wireframes that guided the SASS styling and asset collection.
- Imported a MySQL database and parsed its contents through Hydrator entity and Viewhelper patterns.
- Managed dependencies and autoloading using composer.
- Created a sanitised and validated search functionality.

IT ASSISTANT SUPPORT ANALYST,  
THE UNIVERSITY OF THE WEST OF ENGLAND, BRISTOL,  
11/2021 - 01/2022:

- Delivered technical information to people of varying digital literacy.
- Reset Multi-Factor Authentication accounts and passwords.
- Remote assisted and troubleshoot problems.
- Used Active Directory (AC & UC) and MS Azure to manage accounts.

SALES ASSISTANT,  
DIESEL, BRISTOL,  
12/2019 - 01/2020:

- Utilised a client-centric approach to identify and sell products.
- Promoted key-performance indicators through brand and product knowledge.
- Maintained order and cleanliness in the stock room and on the shop floor.
- Worked as part of a team and learned from and assisted my colleagues.

RETREAT CHEF,  
TRIKA YOGA LTD, CALA GONONE, SARDINIA,  
09/2019:

Working alongside another chef we:

- Designed a menu around locally available produce and planned preparations.
- Provided breakfast, lunch, and dinner that catered for varied diet requirements.
- Followed food hygiene practices and maintained cleanliness.

CASE MANAGER,  
LONDON & COUNTRY, BATH,  
09/2021 - 10/2021:

- Reviewed and processed mortgage documentation.
- Conducted money laundering checks with care and diligence.
- Communicated case matters with clients and colleagues.
- Worked within a team to achieve collective goals.

MODEL,  
DI-MODELS: WOW-JEWELLERY, LONDON,  
11/2019:

- Modelled client's products solo and in collaboration with another model.
- Followed directions on and provided poses to fulfil the client's brief.
- Punctually arrived and acted professionally and politely with the team.

VARIOUS ROLES,  
SANLAM LIFE & PENSIONS UK LTD, BRISTOL,  
02/2016 - 08/2019:

- Initialised, investigated, and provided final responses to complaints as part of the complaints department; and developed a work tracking and reporting application with Excel.
- As part of a Legacy Review I analysed client data and provided reports on my findings.
- Administered vacant properties, dilapidations processes, lease-ends and renewals; and trained colleagues in my former duties processing and reconciling accounts, and reducing arrears, throughout my time with the property team.
- Assisted the complaints department with initialising and closing cases, and provided general assistance with data storage and transfer.

## EDUCATION

**Full Stack Software Development**  
iO Academy in Bath 2022

**BSc(Hons) Psychology 2:1**  
University of the West of England 2013

**A-Levels:**  
- **English Language**  
- **Psychology**  
- **History**  
- **ICT**  
Shrewsbury Sixth Form College 2008

## PROFESSIONAL QUALIFICATION:

**Certified Scrum Master**  
Scrum Alliance - Feb 2022

## INTERESTS

I enjoy code challenges and creating personal projects in my own time. My current goal being able to use code to automate gardening, which segues nicely into my love of vegetable gardening. Having read into plant fungal and microbial networks, I set about nurturing my soil beds in preparation for the coming 14 ft sunflower, potatoes, courgettes, and tomatoes. I love the process of implementing knowledge and seeing results.
