Code Meetups - PHPSW

EDUCATION

Full Stack Software Development
iO Academy in Bath   2022

BSc(Hons) Psychology   2:1
University of the West of England   2013

A-Levels:
 - **English Language**
 - **Psychology**
 - **History**
 - **ICT**
Shrewsbury Sixth Form College   2008

FULL STACK SOFTWARE DEVELOPER

I am an eager and committed individual looking to expand my experience as a Full Stack Developer. In positions that provide challenges and opportunities for learning, I quickly adopt new skills and processes. Working individually, I am highly focused, and within a team, I have an uplifting and collaborative influence.

PROJECTS

As a graduate of iO Academy in Bath, I worked on projects individually and as part of a scrum team. Every project followed an agreed Git branching strategy for version control, and pull requests were peer reviewed for consistent code quality. Below is a selection of them and links to their GitHub repositories; more examples are on my portfolio.

WORD NERD - JAVASCRIPT GAME

Following a brief to build a version of the game 'Wordle' we:
 - Fetched JSON data to select the randomised word.
 - Compared the random word to the cookie's and used logic to refresh the page until they were different.
 - Utilised event-listeners to manipulate the DOM for the keypad interface.
 - Validated and sanitised the input from malicious users.

And I had the pleasure of acting as Scrum Master.

JOB LISTING - JAVASCRIPT REACT

Tasked with creating a job listing site in React we:
 - Agreed a component structure to anticipate bottlenecks and where the use of hooks, useState and useEffect, were needed.
 - Used SASS to keep styling inline with the brief's designs, creating variables for its repeating features.
 - Asynchronously parsed JSON data from an API.
 - Pair-programmed a modal template for rendering individual job data.

DINO FINDER - OBJECT ORIENTED PHP

In order to make a collection we:
 - Designed hi-fidelity wireframes that guided the SASS styling and asset collection
 - Imported a MySQL database and parsed its contents through Hydrator entity and Viewhelper patterns.
 - Managed dependencies and autoloading using composer.
 - Created a sanitised and validated search functionality.
 - Unit tested all required functions.

JOB HISTORY

IT Assistant Support Analyst   University of the West of England   Bristol   11/2021 - 01/2022
Initially enabling users to gain access to their accounts with password and MFA resets, I then adapted to assist with additional issues.

Case Manager   London & Country   Bath   09/2021 - 10/2021
Enacted skill, care, and diligence processing clients' mortgage documents; which were uploaded to lenders once satisfied with them.

Sales Assistant   Diesel   Bristol   12/2019 - 01/2020
Utilised knowledge of the brand and its products to enhance KPIs, and, through a client-centric approach, identified suitable products from new and old lines.

Various Roles   Sanlam Life & Pensions UK Ltd   Bristol   02/2016 - 08/2019
Progressed through increasing responsibilities and specialisations from property admin to complaint handler. Gained successes and experience making myself available for new opportunities to gain and apply knowledge.
